Aditi Avinash Sable

LinkedIn: linkedin.com/in/aditi-avinash-sable
Email: sableaditi8@gmail.com
Github: github.com/Adii-tii
Mobile: +91-9121850093

SKILLS

Languages: Python, JavaScript, C++, C, HTML, Java
Frameworks: ReactJS, ExpressJS, TensorFlow, FastAPI, Keras, Langchain
Tools/Platforms: MySQL, MongoDB, Git, Docker, AWS
Soft Skills: Versatile, Industrious, Team Player, Communication

PROJECTS

Mergeflow - GitHub Pull Request Management Platform | GITHUB Since Feb'26

- Engineering a microservices-based backend using Node.js and Express with an API Gateway using http-proxy-middleware to route requests across authentication, GitHub, AI, and database services with JWT and OAuth2 authentication.
- Developing a React frontend using Vite, Tailwind CSS, and Axios, using React hooks and Context API to manage state and render pull requests with filtering, sorting, server-side pagination, and polling.
- Integrating Mistral API for pull request analysis with Joi-based validation and MongoDB persistence using Mongoose.

Expense Merge - An Expense Management System | GITHUB Jan'26

- Built Expense Merge, a scalable full-stack finance app combining group expense splitting and personal finance management.
- Implemented a granular RBAC system, secure authentication (JWT, OAuth2/OIDC), RESTful APIs, and Razorpay-based subscriptions with webhook-driven reliability.
- Designed a modular architecture with independent frontend/backend deployments and performance optimizations like server-side pagination.

SignSpeak - Sign Language Recognition System | GITHUB Apr'25

- Architected a real time sign language recognition pipeline on the Microsoft English SLR dataset targeting low latency classification across 20 gesture classes.
- Extracted skeletal landmarks via MediaPipe and applied K-Means temporal distillation employed Graph Attention Networks with Simple Recurrent Units for structured spatio-temporal sequence learning.
- Realized ~92% classification accuracy with a 30% reduction in inference time relative to conventional SLR baselines.

TRAINING

SheFi | *Web3 and DeFi Program* Oct'25 – Dec'25

- Participated in a global Web3 and DeFi program with a cohort of 3,000+ female participants gaining exposure to blockchain and decentralized finance.
- Attended 20+ structured sessions on smart contracts, zero knowledge proof frameworks, consensus protocols, non-fungible tokens, and decentralised exchange mechanics.

Cipher Schools | *Full Stack Web Development (MERN)* May'25 – Jun'25

- Gained practical proficiency in MERN stack along with experience in building REST APIs, component driven UI, and data handling.
- Developed a habit tracker webapp with Firebase authentication, state retention, and database backed activity recording.

CERTIFICATES

Full-stack Development with MERN Stack | *Cipher Schools* | **CERTIFICATE** May'25
Affective Computing | *IIIT Delhi, NPTEL* | **CERTIFICATE** Apr'25
Data Analysis with Python | *IBM, Coursera* | **CERTIFICATE** Feb'25
Data Structures and Algorithms | *iamneo* | **CERTIFICATE** Sep'24

CO- CURRICULAR

Graphic Designer | *Division of Student Organization, Lovely Professional University* Jul' 24 – Mar'25
Intern | *Pahal NGO, Punjab* May' 24 – Jun'24
Club President | *Centre of Professional Enhancement, Lovely Professional University* Sep' 23 – Sep'24

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 9.04** Since Aug'23
Army Public School RK Puram Secunderabad, Telengana
Senior Secondary - PCM; **Percentage: 90.20** Mar' 22 – May' 23
